Glimpses From Convocation Ceremony

About IIITB

The International Institute of Information Technology Bangalore (IIITB)

Established in 1998, IIITB is a premier institute known for its interdisciplinary approach, integrating technology with social sciences. Supported by the Government of Karnataka and the IT industry, IIITB fosters strong academic-industry partnerships and attracts top talent from across India and abroad through its merit-based selection process.

The institute has graduated over 3,500 students, many of whom work at leading IT companies globally. With a focus on research and development in fields like Artificial Intelligence (AI) and Machine Learning (ML), IIITB is recognised as a leader in AI education.

Ranked 74th in the Engineering category of the National Institutional Ranking Framework (NIRF) in 2022, IIITB continues to excel in education and research, making it a preferred destination for aspiring technologists and future leaders.

AICTE | UGC

ABOUT upGrad

"upGrad is a leading global learning and workforce development company. We're on a single-minded mission of powering career success for every member of the global workforce as their trusted lifelong learning partner. Established in 2015, we have over 10 million learners who have upskilled in a range of online and offline programs from top universities in India and the world."

Program Highlights

Here are the top reasons why you should consider this program

Future-Ready Curriculum
Master In-Demand and Trending Competencies

Personalised Learning Experience
Learning Experience Tailored to Your Needs

Specialisations
Specialise in Two In-Demand Data Science Specialisations

In-Demand Tools
80+ Industry Tools, Languages, Libraries

Outcome-Driven Learning Experience
Personalised Portfolio-Building Support and Career Preparation Sessions

Best-in-Industry Experts
Decorated IIITB Faculty and Top Industry Practitioners

Golden Learning Ratio
Perfect Blend of Mathematics, Technology, and Business Understanding

Hands-on Learning
Solve 30+ Domain-Focused Assignments and Case Studies

Offline Graduation Function
On-Campus Graduation Ceremony for a Complete Program Experience

1800+ Industry Hiring Partners

Program Completion Certificate

Earn valuable credentials with an Executive Diploma in Machine Learning and Artificial Intelligence-equivalent to a 1-year PG Diploma and accredited with NAAC A+ (2021). Join India's largest ML AI alumni network of over 10,000 professionals.

Faculty

Dr. Debabrata Das
Director of IIITB

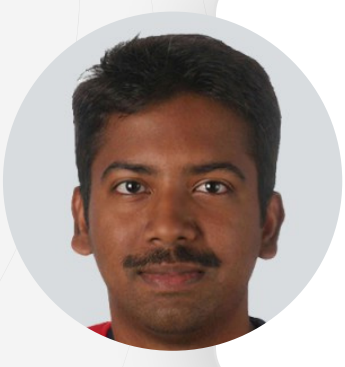
He has received his PhD from IIT-KGP.
His main areas of research are IoT and Wireless Access Network.

Prof. Chandrashekar Ramanathan
Dean Academics, IIITB

Prof. Chandrashekar has a PhD from Mississippi State University and experience of over 10 years in several multinational organisations.

Prof. G. Srinivasaraghavan
Professor, IIITB

Prof. Srinivasaraghavan has a PhD in Computer Science from IIT-K and 18 years of experience with Infosys Technologies and several other companies.



Dr. Dinesh Babu Jayagopi
Professor, IIITB

Dr. Dinesh is currently an Associate Professor at IIIT-B where he heads the Multimodal Perception Lab. His research interests are in Audio-Visual Signal Processing, Machine Learning, and Social Computing. He obtained his doctorate from Ecole Polytechnic Federale Lausanne (EPFL), Switzerland.

Chandrashekar Ramanathan
Professor & Dean (Academics)

Prof. Chandrashekar is a faculty member at IIIT-B since 2007 serving as professor, researcher and administrator. He has been working in the field of Computing for over 25 years in various capacities across industry and academia.

Tricha Anjali
Ex-Associate Dean

Prof. Anjali has a PhD from Georgia Institute of Technology as well as an integrated MTech (EE) from IIT Bombay.

Industry Experts

Abhishek Vijayvargia
Senior Data Scientist

Having worked with Microsoft as a Senior Data Scientist, he is an alumnus of IIT Kharagpur with 10+ years of experience in a Data Science domain

Microsoft
Ex-Senior Data Scientist

Anand
CEO

CEO, Gramener A gold medallist from IIM Bangalore, an alumnus of IIT Madras and London Business School, Anand is among the top 10 data scientists in India with 20 years of experience.

IIT MADRAS Indian Institute of Technology Madras
Faculty

Infosys
Principal

BCG
Ex-Consultant

Manish Shukla
Head of Generative AI

Leading cutting-edge GenAI platform development at NatWest Group. Expertise in OpenAI products and MLOps for optimisation of operational efficiency and seamless project delivery with high user satisfaction.

Microsoft
Release Manager

NOKIA
Release Manager

Scrum Alliance®
Certified Scrum Master

Deependra Singh
VP & Head of Data Science

Over 15 years of experience in leading analytics practices, data science, deep learning, and AI product development. Successfully led teams at Junglee Games, American Express Digital Business, and National Insurance Company, pioneering key projects like the analytics engine for the GOI PMJAY policy. Respected speaker at top educational institutes like IMT Hyderabad, BIT Mesra, and NMIMS.

IIMB तेजस्वि नावधीतमस्तु

Sajan Kedia
Sr. Engineering manager

Senior Engineering Manager, Hotstar Sajan has extensive experience in the field of ML, Big Data, Data Science, and AI.

Sr. Engineering manager

Myntra
Machine Learning Engineer

IBM
Machine Learning Research Engineer

Mirza Rahim Baig
Startup Mentor

Analytics Lead, Zalando Mirza is a veteran professional with 10+ years of experience in application of data science, machine learning in e-commerce and healthcare.

Your Program Journey

Phase 0

Math and Programming Bootcamp (12 weeks)

Phase I

Core Curriculum

(25 weeks, 15 credits)

Phase III

Capstone

(4 weeks, 7 credits)

Phase II

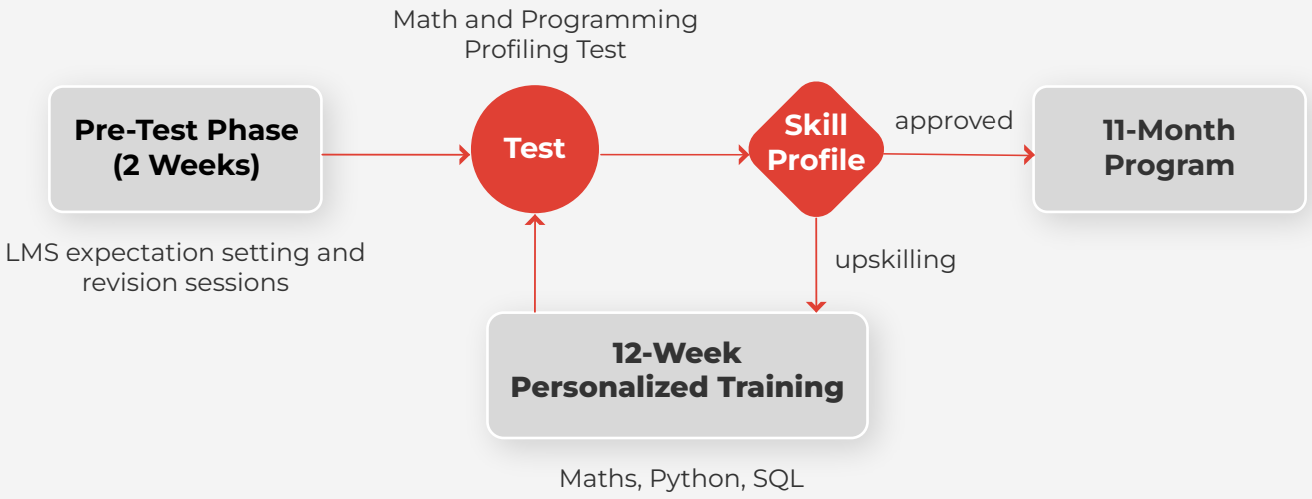
Specialisations

MLOps/GenAI

(20 weeks, 14 credits)

Applied Math and Programming Bootcamp

Personalise the initial 3 months of the program to your profile



Topics: Sets, Combinatorics, Basics of Probability, Conditional Probability, Descriptive Statistics, Functions, Vector Algebra, Derivatives, Integrals, Coding Environments, Variables, Data Types, Syntax, Conditionals, Loops, Functions, Lists, Sets, Tuples, Dictionaries, Introduction to MySQL, Basic SQL Querying

Marks Structure: Total marks - 100

- Section A - **40 marks,** basic mathematics Section B - **60 marks,** basic programming
- Passing marks - 25 marks in section A & 35 marks in section B

Unlimited attempts at the test and the bootcamp at no added cost!
We make sure that you are well-equipped to draw the most benefit from the program!

CORE CURRICULUM

Core Curriculum

The core phase of the curriculum will equip you with the most up-to-date and industry-relevant skills and technologies for data science and machine learning such as programming and mathematics, data analysis tools and techniques, cloud computing and big data analytics, and foundational topics in machine learning, deep learning, and natural language processing.

Topics

Advanced Mathematics for Data Science and Machine Learning

Master essential mathematical concepts to understand how to work with large amounts of data and train efficient machine learning models

- **Conditional Probability and Probability Distributions**
- **Advanced Linear Algebra and Linear Transformations**
- **Multivariate Calculus**

Advanced Programming for Data Science and Machine Learning

Wrangle real-world data using universal programming languages such as Python and SQL, and use GenAI for generating and debugging code faster

- **GenAI for Coding and Problem-Solving**
- **Object-Oriented Programming**
- **Python Data Science Libraries**
- **Database Design and SQL Querying with MySQL**
- **Introduction to NoSQL Databases**

Data Analysis and Exploration

Implement industry-standard statistical methods using tools such as Python, Tableau, and Power BI to analyse data and derive business insights

- **Data Analysis with Python**
- **Exploratory Data Analysis**
- **Inferential Statistics and Hypothesis Testing**
- **Data Analysis and Visualisation with Power BI and Tableau**

Cloud Computing and Big Data Fundamentals

Take your data processing and analysis workflows to the cloud and work with larger amounts of data to derive enterprise-scale business insights

- **Cloud Computing with AWS, GCP, Microsoft Azure**
- **Big Data Analysis with PySpark**

Foundations of Machine Learning

Train industry-standard machine learning models to automate insight generation and predict business metrics behaviour

- **Machine Learning Paradigms**
- **Linear and Logistic Regression**
- **K Nearest Neighbors**
- **Regularisation and Hyperparameter Tuning**
- **Decision Trees and Ensembles**
- **Clustering Models**

Deep Learning and Natural Language Processing

Build and train deep neural network models for different kinds of business data such as images and sequences

- **Artificial Neural Networks**
- **Convolutional and Recurrent Neural Networks**
- **Lexical, Syntactic, and Semantic Processing**

Deployment Fundamentals

Share and deploy your insights and machine learning models so that other collaborators can work with your contributions

- **Containerisation and Deployment Tools**
- **Version Control**

Projects

- **Querying with SQL**
  Analyse Spotify music data for targeted recommendations or NDAP insurance data for risk assessment
- **Exploratory Data Analysis**
  Analyse NYC taxi operations for efficient taxi positioning or US beer production data for better brewery operation management
- **Big Data Analysis**
  Analyse Mercari products data for better targeted recommendations or customer interaction data to enhance customer engagement
- **Linear Regression**
  Predict household energy consumption using appliance energy readings data to increase power consumption efficiency or parcel delivery time for Porter using historical delivery data for better planning and management
- **Deep Learning**
  Predict stock prices of Microsoft, Amazon, Google, IBM, using their historical stock price variations or temperature/pressure readings in Morocco using historical weather data

Tools

The use of these names, logos, and brands does not imply any endorsement, affiliation, or partnership with the respective trademark holders.

MLOps SPECIALISATION

MLOps Specialisation

The machine learning operations (MLOps) specialisation of the curriculum will equip you with core in-demand and industry relevant skills and technologies essential for ML engineers such as advanced machine learning methods, modern deep learning architectures, real-time data processing and end-to-end data pipeline creation and monitoring, and model pipelining and monitoring at scale.

Topics

Advanced Machine Learning

Train advanced industry-oriented machine learning models for enhanced predictive power and stronger business insight generation

- **Support Vector Machines and Naive Bayes**
- **Feature Engineering and Model Selection**
- **Dimensionality Reduction**
- **Time Series Analysis**
- **Association Rule Mining and Recommendation Systems**
- **Explainable AI**

Advanced Deep Learning and Generative AI

Design and train advanced industry-standard deep learning architectures, and master core AI principles such as attention mechanisms, transformers, and prompt engineering

- **Advanced CNN Architectures**
- **LSTMs and GRUs**
- **Transfer Learning Techniques**
- **Encoder-Decoder Architectures and Seq2Seq**
- **Machine Translation**
- **Attention Mechanisms and Transformers**
- **Fundamentals of Generative AI and Prompt Engineering**
- **Computer Vision, Variational Autoencoders, Generative Adversarial Networks**
- **Data and Model Security Principles**

Large-Scale Data Pipelining

Build complete end-to-end data pipelines and automate them to generate both batch-wise and real-time business insights

- **End-to-End Data Pipelining Fundamentals**
- **Pipeline Automation with AWS Lambda, GCP Functions, and Azure Automation**
- **Data Monitoring with Amazon CloudWatch, Google Cloud Monitoring, and Azure Monitor**
- **Feature Stores and Vector Databases**
- **Real-Time Analytics with Flink, Kafka, and Spark Streaming**
- **Real-Time Analytics with Amazon Kinesis, Google Cloud Pub/Sub and DataFlow, Azure Stream Analytics and Event Hubs**
- **Multicloud and Hybrid Cloud Operating Principles**

Machine Learning Model Pipelining

Build end-to-end industry-ready ML model pipelines and design their functional behaviour such as training and inference

- **Model Pipelining Principles**
- **Scheduling and Triggers**
- **Parallel Model Training and Real-Time Model Serving**
- **Data and Model Versioning**
- **Model Monitoring and System Design**

Projects

- **Feature Engineering and Model Selection**
  Predict fraudulent insurance claims using the Mendeley farmers insurance claims dataset or network intrusion events using historical network activity data
- **Semantic Classification**
  Fake News Detection, Job Role Classification
- **Real-Time Data Analytics: Develop a**
  real-time analytics pipeline for ecommerce data to enhance customer experience or a real-time patient health monitoring system for faster corrective actioning
- **Simulate and Retrigger Model Training Pipeline**

Tools

Disclaimer: All product names, logos, brands, and trademarks are property of their respective owners. All company, product, and service names used on this platform are for identification and educational purposes only. The use of these names, logos, and brands does not imply any endorsement, affiliation, or partnership with the respective trademark holders.

MLOps SPECIALISATION

Generative AI Specialisation

The generative artificial intelligence (GenAI) specialisation of the curriculum will equip you modern AI technologies and methods, particularly generative AI technologies, essential to data scientists and AI specialists, such as advanced machine learning methods, modern deep learning architectures, advanced prompt engineering and generative AI system design, information retrieval and retrieval-augmented generation, large language model (LLM) deployment, advanced computer vision and 3D vision, GenAI optimisations, and AI ethics.

Topics

Advanced Machine Learning

Train advanced industry-oriented machine learning models for enhanced predictive power and stronger business insight generation

- **Support Vector Machines and Naive Bayes**
- **Feature Engineering and Model Selection**
- **Dimensionality Reduction**
- **Time Series Analysis**
- **Association Rule Mining and Recommendation Systems**
- **Explainable AI**

Advanced Deep Learning for Generative AI

Design and train advanced industry-standard deep learning architectures, and master core AI principles such as attention mechanisms, transformers, and prompt engineering

- **Advanced CNN Architectures**
- **LSTMs and GRUs**
- **Transfer Learning Techniques**
- **Encoder-Decoder Architectures and Seq2Seq**
- **Machine Translation**
- **Attention Mechanisms and Transformers**
- **Fundamentals of Generative AI and Prompt Engineering**
- **Computer Vision, Variational Autoencoders, Generative Adversarial Networks**
- **Data and Model Security Principles**

GenAI System Design

Design and orchestrate generative AI systems to leverage the power of generative AI models and transform business operations

- **Advanced Prompt Engineering and GenAI System Design**
- **Prompting Multimodal Models**
- **LLM Frameworks such as LangChain and LLaMa Index**
- **LLM Evaluation Methods**
- **Data Security and Governance**
- **AI Ethics**

Advanced Generative AI

Develop AI-based cutting-edge industry-level systems for greater business efficiency such as retrieval-augmented generation (RAG) systems and multimodal GenAI model prompt engineering

- **Information Retrieval Principles**
- **Embeddings and Vector Databases**
- **RAG Architectures**
- **Agentic Systems and Multi-Agent Systems**
- **Advanced Multimodal GenAI Models**
- **LLM Deployment**
- **Advanced Computer Vision and 3D Vision**
- **GenAI Optimisations**

Projects

- **Feature Engineering and Model Selection**
  Predict fraudulent insurance claims using the Mendeley farmers insurance claims dataset or network intrusion events using historical network activity data

- **Semantic Classification**
  Fake News Detection, Job Role Classification

- **GenAI System Design**
  Analyse Amazon customer reviews to identify prevalent sentiments and themes to improve product offerings and enhance customer satisfaction or ChatGPT customer feedback to derive actionable insights for business improvement

- **RAG**
  Develop an RAG system to transform Long Beach County Municipal meetings transcripts into actionable insights for better organisational communication and decision making or historical legal documentations to optimise legal workflows

Tools

OpenAI, Hugging Face, Chroma, Pinecone, Milvus, deepseek, Gemini, LlamaIndex, LangChain, Stable Diffusion, Claude, pgvector, OpenCV, Eli5, Imagen, Featuretools, MLXtend, Prophet, crewai, Ollama, LangGraph, OpenAI CLIP, Autogen, DALL·E

Disclaimer: All product names, logos, brands, and trademarks are property of their respective owners. CAPSTONE PROJECTS

Capstone Projects

Capstone that Adapts to Your Preference

Infuse our Capstone with Your Data

Modify existing projects as per your industry data and problems

Bring Your Own Capstone

Work on a completely novel project of your choice and solve problems that excite you

Pre-Designed Industry Capstone

Choose one of our existing projects that cover in-demand trending industry domains

Bring Your Own Capstone

Design your own capstone project relevant to your domain and interest, and get feedback throughout your capstone stages

- Identify a real-world problem relevant to your domain
- Source datasets aligned with your business problem
- Design and implement your solution
- Document your efforts and present your findings
- Continuous expert feedback at every step of capstone

Build A Strong Portfolio

GitHub

- **Commits**
  Demonstrate consistency, collaboration, and coding discipline
- **Code**
  Showcase well-documented repositories
- **Projects**
  Host end-to-end DS/ML/AI projects that highlight real-world problem-solving

GitHub helps with

- Validating coding skills
- Showing growth and consistency
- Being interview-ready for Tech roles

kaggle

- **Kernels**
  Highlight data processing and EDA methodologies
- **Ranking**
  Evaluate and reflect global standing among data science practitioners
- **Competitions**
  Demonstrate problem-solving under tight constraints

Kaggle helps with

- Building credibility in data science circles
- Applying learning to real datasets
- Speaking confidently in Tech interviews

LinkedIn

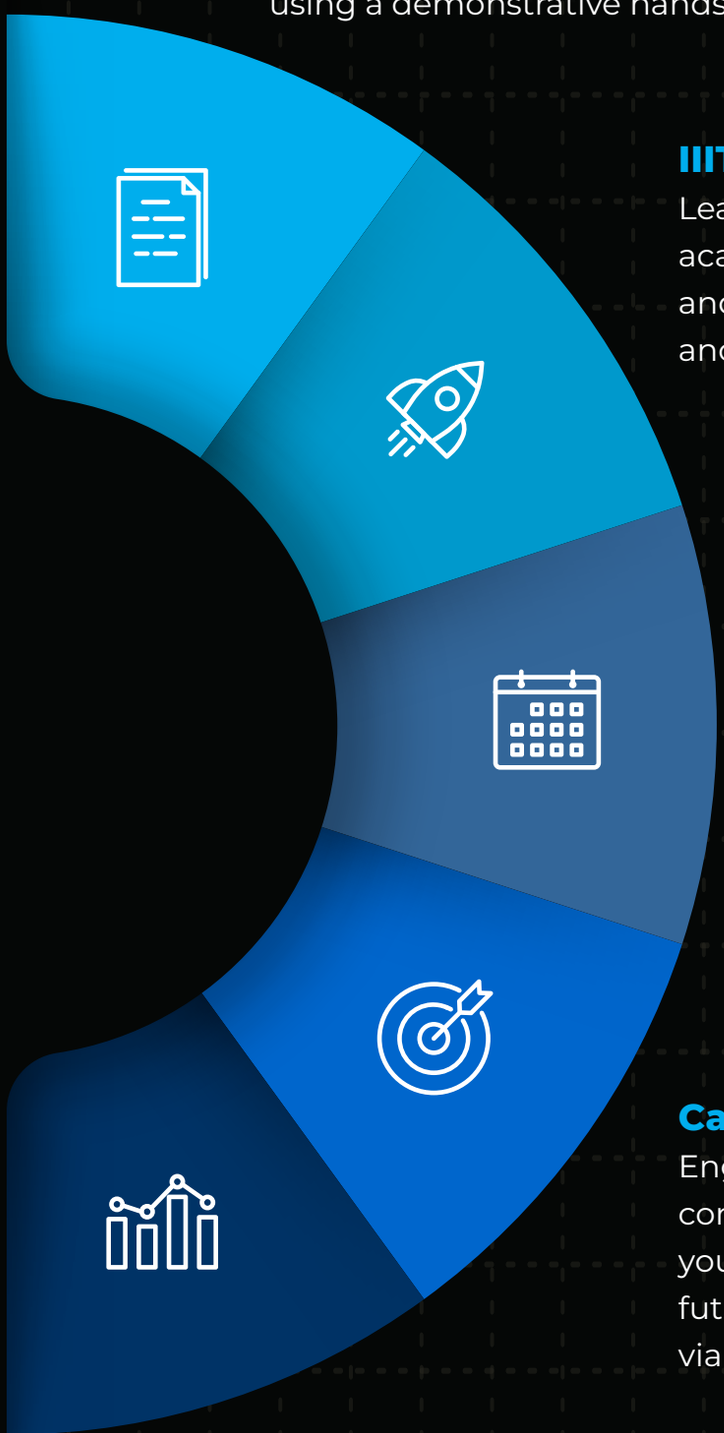
- **Headline**
  Concise summary of goals, competencies, and professional identity
- **Summary**
  Engaging overview of learnin and career journey
- **Projects**
  Showcase practical experience, outcomes, and skill application

LinkedIn helps with

- Improving visibility with recruiters
- Positioning better for job openings
- Networking with peers and mentors in the field

Rich and Dedicated Live Support

Industry expert sessions
Engage with industry practitioners as they help you master in-demand skills and concepts using a demonstrative hands-on approach.



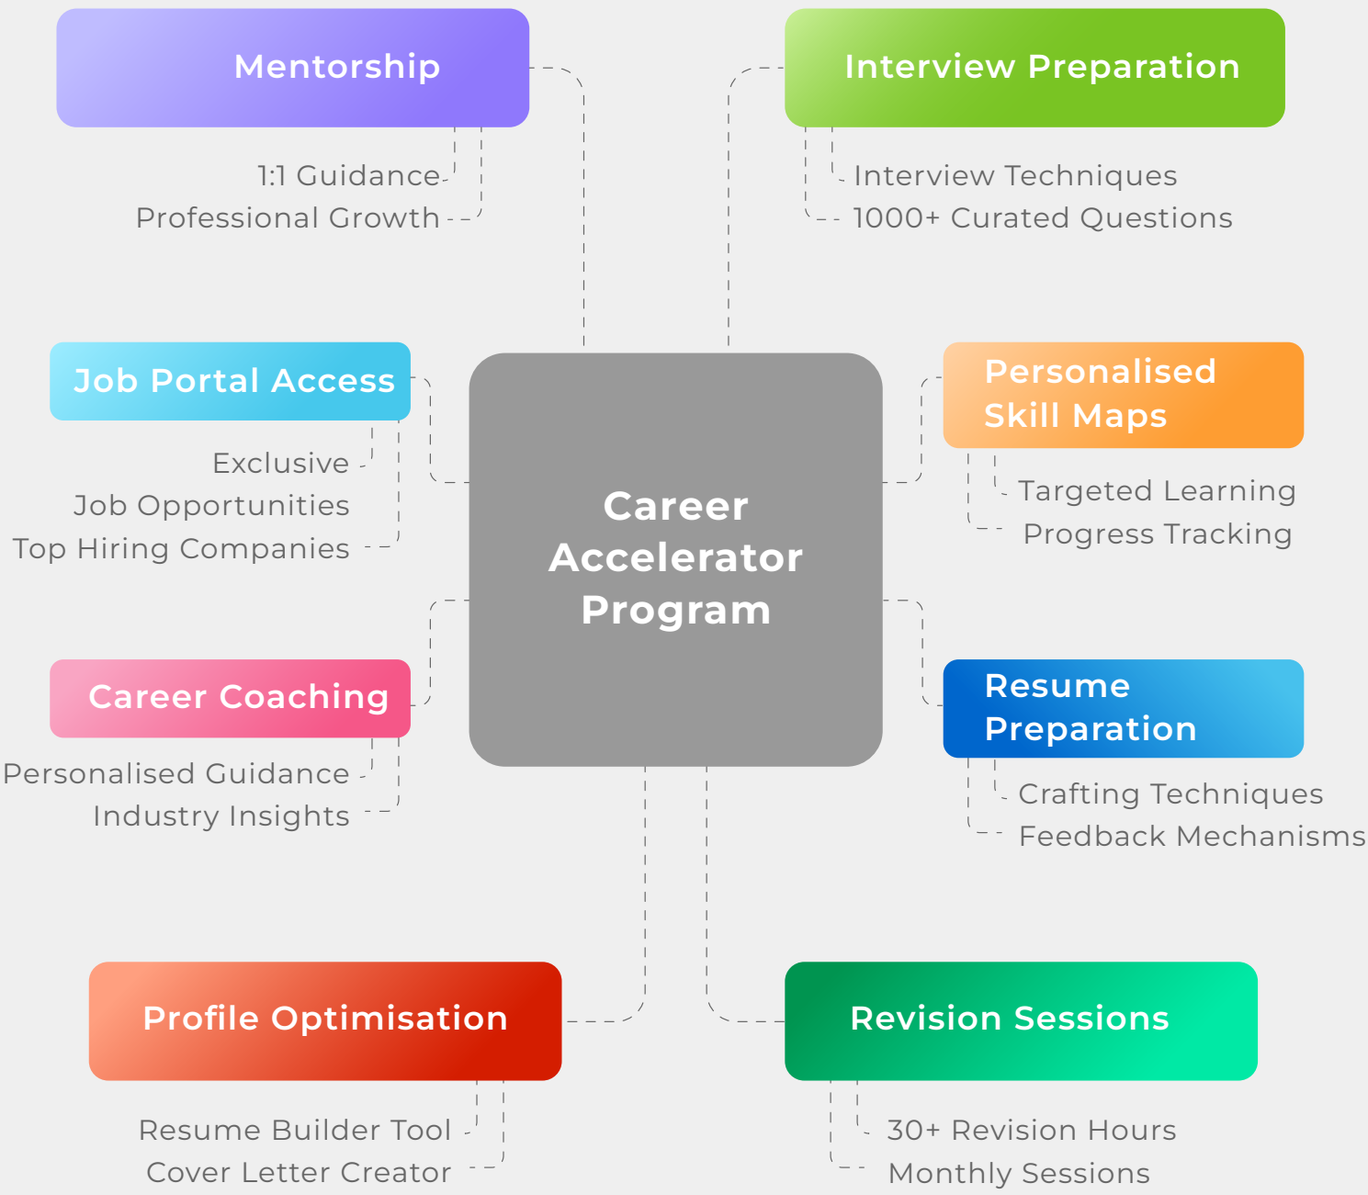
IIITB faculty sessions
Learn from some of the most accomplished academicians as they take your knowledge and understanding of data science to another level.

Personalised industry sessions
Participate in focussed sessions within a limited audience group as industry experts dive deeper into the industrial and business-related aspects of various advanced topics and technologies.

Career mentorship sessions
Engage in personalised career mentorship connects with industry experts as they guide you on the best practices for your career future and even help you be better prepared via mock interviews.

Daily doubt resolution sessions
Join doubt resolution session slots, that are available daily, and have an expert available to resolve your queries for a smooth learning journey

Effective and Complete Career Support



Student Support

Telegram channel for learner communications

Cohort Telegram channel for instant doubt resolution and timely program updates and announcements

Non-academic and non-technical query assistance

Get help with any non-academic or non-technical queries and updates through buddy sessions

Completion Support

Personalised assistance for smooth program completion, managing backlogs, and cohort deferrals with free and paid waiver options

Personalised support

Personalised assistance tailored to individual learner requirements

Financial benefits

Access benefits like referrals and repeats by sharing details with your upGrad buddy
